SEPTEMBER 15, 2025 | 8:30 a.m. to 4:30 p.m. | LAS VEGAS, NV

INTERNATIONAL FASTENER EXPO

FASTENER PLATINGS, COATINGS AND CORROSION AT IFE

Fastener Platings, Coatings, and Corrosion at International Fastener Expo is an all-day workshop brought to you by the Fastener Training Institute. Industries spend billions of dollars fighting corrosion – but fasteners present a special challenge. Choosing the right materials and finishes to combat corrosion in fasteners is essential. There are several strategies to employ - and for suppliers, manufacturers or fastener users - it is essential to know all options.

This full day training explores and explains each strategy and equips students with the knowledge to make the right decisions for corrosion prevention.

TOPICS INCLUDE

- Platings, coatings, finishes and surface treatments
- Fastener finish standards
- Tests used for corrosion resistance capability and coating thickness
- Controlling risks when plating fasteners
- Stainless steel fasteners
- Other materials that combat corrosion
- The K Factor
- Passivation
- What's new in fastener finish technology

WHO SHOULD ATTEND?

This fastener training program is technical, and standards based, but is suitable for all levels of experience in the fastener industry.
